## UPMC Hosts Groundbreaking Ceremony For Twin Lakes Facility

Our team was honored to attend UPMC's groundbreaking ceremony for their Twin Lakes Rehabilitation Center expansion project in Somerset, PA. The expansion will include 24 new treatment beds which increases capacity by 60%. The project also involves a renovation to the current facility that currently holds 40 treatment beds. Special thanks to UPMC and the entire design team for allowing us to serve the Somerset community and those in need on this state-of-the-art project.

## Gatter & Diehl Attends Schaedler Yesco Distribution Expo

On April 14, some members of our team had the privilege to attend the Schaedler Yesco Distribution Expo at the Hershey Lodge and Convention Center in Hershey, PA. We had the opportunity to partake in several learning sessions and informative workshops with over 90 different exhibitors, as well as network with numerous people within the industry.

## Phoenix Contact Showcases Solar Array During Earth Day Celebration

What better way to spend Earth Day than showcasing a 1 megawatt solar power system with our friends at Phoenix Contact. At the beginning of the year, implementation was finalized for Phoenix Contact's solar power system which is expected to produce over 40% of the energy needed for their Middletown facility's operations. President of Phoenix Contact USA, Jack Nehlig, and VP of Operations, Doug Ferguson, provided an insightful presentation and demonstration to the attendees on the benefits of solar power and clean, renewable energy. It was an honor to partake in the event and we're very excited to see Phoenix Contact transform into a carbon neutral campus.

# WE'RE HIRING!

## JOIN OUR TEAM

Want to join an expanding team of professional engineers that has provided clients with proven solutions for over 75 years and a family-friendly culture that accommodates a great work/life balance for its employees? Then apply with us! Gatter & Diehl is hiring for both mechanical and electrical positions.

## Local STEM Programs Receive Contribution

STEM programs are a great way to get young students involved in the A/E/C industry. It allows students to receive a better understanding of how the industry works and gives the individual hands-on experience. That's why we were honored to contribute to two local area school's STEM programs. We're glad to help future engineers in any way possible.
